Problem Set 1

Emma Chiu

April 6, 2023

Treatment effects for endline variables

	(1) spandana_amt_1	(2) bizinvestment_1	(3) wages_nonbiz_1
treatment	1632.5***	377.8	-291.6**
	(15.89)	(1.96)	(-3.05)
_cons	597.4***	280.1***	2988.0***
	(11.71)	(3.94)	(43.49)
N	6811	6800	6827

t statistics in parentheses

* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$

Treatment effects for endline variables with area-level covariates

	(1) spandana_amt_1	(2) bizinvestment_1	(3) wages_nonbiz_1
treatment	1698.9***	383.4	-536.2***
	(16.90)	(1.86)	(-5.75)
area_pop_base	0.236	-0.0264	-2.745***
	(0.69)	(-0.06)	(-8.36)
area_debt_total_base	0.0156***	0.000977	-0.0143***
	(4.88)	(0.54)	(-6.17)
area_business_total_base	-24.12*	2.031	-95.23***
	(-2.43)	(0.08)	(-10.00)
